

	Feature	Action	Expected result	Observed result
1	A home page showing (dynamically) all products available for sale	Open the home page in a browser.	Display all the products	OK / error
2	Dynamic product pages for each individual product	Navigate to the product from the home page within a browser.	Display the individual products as navigated to from the home page.	OK / error
3	Drop down menus on product pages for customising colour of the product.	Use drop down menu to select colour of a given product.	Drop down menu displaying correct colours per product.	OK / error
4	Ability to choose a quantity of each product from the product page	Use the quantity menu item on the product page to modify the quantity of each product.	Manually enter or use up/down arrows to specify a quantity.	OK / error
5	Modify item quantity and update cart totals on cart page.	Use quantity selector element on the cart page to update the required quantity of each product in the users cart.	Quantity of desired item should update via manually input or up/down arrows. Cart total quantity and price should also auto-update based on changes made.	OK / error
6	Removal of items from the cart	Use delete items button to remove item from cart.	Cart item associated with the delete item button should be removed on click and the cart totals updated to reflect the removal of the item.	OK / error
7	Cart products should be grouped by model and colour.	Add multiple iterations of the same product to the cart, with both matching and non-matching colours.	Products that are the same item but a different colour should not group in the cart. Products added to the cart that are the same colour should update the item quantity and not add a separate item.	OK / error
8	Display order number on confirmation page.	Navigate to confirmation page by confirming order and verify presence of order number in the confirmation page display.	Order number present on confirmation page after order confirmed by user.	OK / error
